J. LEDERBERG

Dr. Joshua Lederberg  
Stanford University Medical Center  
Department of Genetics  
Stanford, Calif. 94305

Dear Dr. Lederberg,

Enclosed is the literature you requested along with some general studies on virus inactivation using  $f_2$  coliphage as a model virus. In addition you will find the continuation of the work begun by Dr. Bernarde with chlorine dioxide.

I am glad to learn of your interest in halogen disinfection and hope that the enclosed information will be useful. If I can be of any further assistance, please contact me.

Sincerely yours,

Vincent P. Olivieri
